## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

The Examiner acknowledges the submission of the amendment filed on 11/22/02.

At this time claim 1 has not been amended, claims 2-7 are newly added claims. Thus, claims 1-7 are pending in the instant application.

#### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 3-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 3 recites the limitation "the heat sink" in line 1. There is insufficient antecedent basis for this limitation in the claim. Claims 4-7 are vague and indefinite as being dependent on claim 3.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application

Art Unit: 2835

being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Hileman.

Hileman discloses the radiation mechanism comprising a board 14 having a front surface, a back surface and a through hole 39, an exoergic part 18, 20 mounted on the front surface, a heat pipe 34 disposed between the front surface and the back surface via the through hole 39.

Claims 1-7 can be alternatively rejected under 35 U.S.C. 102(a) as being anticipated by Liu et al.

Liu discloses the radiation mechanism comprising a board 54 having a front surface and back surface, one of the surfaces mounted on an exoergic part 22, the board 54 includes a through hole 38, a heat pipe disposed between the front surface and the back surface of the board via the through hole 38, the heat pipe 36 runs parallel to the front surface and to the back surface, as claimed in claims 2 and 7, and a fan-cum-heat sink 26 disposed above or under the through hole 38 depending on the orientation of the whole assembly, as claimed in claim 3 and absorbs air from the surface of the board 56 and exhaust it in a direction parallel to the surface of the board, as claimed in claims 4 and 5.

### ***Response to Arguments***

4. In response to Applicant's argument that Hileman does not disclose limitation in claim 1 that a heat pipe disposed between the front surface and the back surface of the

Art Unit: 2835

board, via the through hole, it must be noted that it has not been shown that the heat pipe passes via through hole in the mother board from one side to another, the drawing, Fig. 6 does not show the motherboard and the Fig. 6 is the only one which shows the heat pipe, and a distinction must be made between the invention described or taught and the invention claimed. It does not require that the reference "teach" what the subject patent teaches. Assuming that a reference is properly "prior art," it is only necessary that the claims under consideration "read on" something disclosed in the reference, i.e., all limitations of the claim are found in the reference, or "fully met" by it.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
